

SPECIFICATION & INFORMATION SHEET

AMADA 4Kw Laser Cutter

AMADA LC 3015 X1 NT 4Kw Laser Cutting Machine

Model – LC3015X1NT

Serial Number – 20510179

Manufactured – August 2007

Operating Running Hours – 14,400

Weight – 11,700kg

Dimensions – 6674L x 3263W x 2100H (mm)

Machine Specifics:

Laser Beam Power – 4 kW

Laser Resonator – ML40CFX

Automatic Pallet Changer (2 tables)

Chiller – HYFRA SVK 720-1/1-S with a Cooling Capacity of (30°): 67000W

Maximum Sheet Metal Thickness (mild steel) – 20 mm

Maximum Sheet Metal Thickness (stainless steel) – 15 mm

Maximum Sheet Metal Thickness (stainless steel, nitrogen cut) – 15 mm

Maximum Sheet Metal Thickness (aluminium) – 10 mm

Weight of Cooling Unit with Empty Tank – 1040 kg

Machine Requirements:

Compressed Air – 6 Bar

Power – 71 kVA

Power Supply – 400 V

This machine has been serviced twice each year by a Mitsubishi engineer and is in perfect running order.

On the 17th of December 2024, the machine will be decommissioned by a Mitsubishi Engineer. The preference would be for a haulage company, appointed by the vendor, to relocate the machine to the purchaser's property on the 18th of December 2024. The cost of which would be passed to the purchaser.

In the instance this cannot be accommodated, the machine will continue to be decommissioned and held in secure storage pending collection by the purchaser.

The Mitsubishi Engineer who is familiar with the machine, is able to provide a quote for installation at the purchaser's property if required.
